

INDUSTRIAL LABELING INFORMATION – WHMIS 2015 / Hazcom 2012

The labelling information in this document is the **MINIMUM** as required by the Canadian Hazardous Products Act (HPA) and Hazardous Products Regulations (HPR) (or WHMIS 2015); and the U.S. OSHA Standard 29 CFR 1910.1200 (Hazcom 2012).

CUSTOMER: American Zinc Recycling

NAME OF PRODUCT: LEAD CONCENTRATE

CONTAINER SIZE: Net quantity unknown

HPR/Hazcom 2012 CLASSIFICATION: This product meets the criteria for inclusion into the following HPR/Hazcom 2012 Hazard Category(ies) and Subcategory(ies): **Acute Toxicity – Category 4 (oral; inhalation); Eye Damage/Irritation – Category 1; Germ Cell Mutagenicity – Category 2; Carcinogenicity – Category 1A; Reproductive Toxicity – Category 1A; Specific Target Organ Toxicity (STOT), Single Exposure – Category 3; Specific Target Organ Toxicity (STOT), Repeated Exposure – Category 1.**

Please note:

Canada also has additional requirements (*e.g. use of the French language, and declaration of Product identity, product net quantity and dealer's name and principal place of business*) on all products marketed within its jurisdiction. **This document does not contain** labeling information for any other requirements other than the HPR. For information on additional requirements, please refer to the Consumer Packaging and Labeling Act & Regulations. These can be found at: <http://lois.justice.gc.ca/en/C-38/C.R.C.-c.417/index.html>. For your convenience, ICC has been able to locate a guide to the Consumer Packaging and Labeling Act & Regulations, which may help navigate through the actual Regulations. This guide can be found at: <http://www.competitionbureau.gc.ca/epic/site/cb-bc.nsf/en/01248e.html>

Label Design - The label of a hazardous product, or the container in which a hazardous product is packaged, must group together the required pictogram(s), signal word and hazard statement(s). Other required label elements (ie. product identifier, initial supplier identifier, precautionary statements) can be placed elsewhere on the label.

Legibility of Labels – WHMIS 2015 / Hazcom 2012 labels must be **clearly and prominently displayed on a surface that is visible under normal conditions of use, easily legible, and contrasted** with other information on the hazardous product label or container. The label must, under normal conditions of transport and use, remain affixed to, printed or written on or attached to the hazardous product or the container and remain legible (will not fade, run, rub off or peel off).

Reproduction of Pictograms - Any pictogram required to be displayed on a label, must be an **exact reproduction** of the pictograms appearing in Column 3 of Schedule 3 of the HPR, or in Appendix C to 1910.1200. The pictogram(s) must have a black symbol on a white background with a red border in the shape of a square set on one of its points.

Revisions to Safety Data Sheets and Labels - Where **significant new data** (data which changes the classification of the product or ways to protect against the hazards presented by the hazardous product) for a hazardous product becomes available, the supplier must revise the Safety Data Sheet (SDS) within 90 days (Canada) / 3 months (U.S.) of the new information becoming available. The supplier must revise the label within 180 days (Canada) / six months (U.S.) of the new information becoming available.

Prepared by ICC the Compliance Center Inc. – (Toni-Ann McLean, Senior Regulatory Specialist)
